Dear Dennis

It is with a great deal of pleasure that we write on behalf of the Board of the Riverina Eastern Regional Organisation of Councils to congratulate Goldenfields Water on winning the Voice Project's Best Workplace of 2020 Award.

The Award recognises Goldenfields commitment to effective management practices including articulating and communicating overall direction, assessing and providing adequate resources, and supporting employees in learning and in career development more broadly.

Attracting and retaining staff for rural and regional councils is always a challenge. Awards such as this are important in recognising the efforts that local government is making to ensure that staff feel supported, empowered and engaged as they help create the communities that we live and work in. We are proud that one of our own Member Councils have been recognised for its outstanding work in this area.

We extend our congratulations to all the Goldenfields' staff who have demonstrated through their actions that they are committed to driving the Organisation's performance forward.

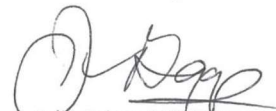

We look forward to your continued involvement in REROC's activities and wish you the very best for the future.

Yours sincerely

03 Strategic Water Management

BACKGROUND

Goldenfields Water provides the essential water requirements of about 40,000 people spread over an area in excess of 20,000 square kilometres between the Lachlan & Murrumbidgee Rivers in the South West of NSW.

Goldenfields Waters' supply system consists of five separate water schemes, Jugiong, Oura, Mt Arthur, Mt Daylight and Hylands Bridge. Goldenfields Water carries out water supply functions within the Local Government areas of Bland, Coolamon, Cootamundra, Hilltops, Junee, Temora, and parts of Narrandera and Wagga Wagga.

Hilltops Shire Council, Cootamundra Gundagai Shire Council and Riverina Water County Council are retailers, who purchase bulk water from Goldenfields and supply the water to retail customers in their respective local government areas.

REPORT

Jugiong drinking Water Scheme

The Jugiong drinking water scheme sources water from the Murrumbidgee River and has an extraction licence entitlement of 5590ML per annum. Water from the Murrumbidgee River is treated through a 40ML/day, conventional Water Treatment Plant that consists of: Coagulation, Flocculation, Clarification, Filtration, Disinfection and Fluoridation.

The Jugiong Scheme has 14 sets of reservoirs and 8 pumping stations. The Jugiong Scheme supplies bulk water to the Hilltops and Cootamundra-Gundagai Regional Councils for supply to the townships of Cootamundra, Harden and Young with a population of approximately 6800, 2200 and 8000 respectively.

Goldenfields Water also provides additional retail supply to approximately 600 customers in the villages of Stockinbingal, Wallendbeen and Springdale.

For the first 11 months of the 2020/21 financial year, only 2759ML of water has been extracted from the Murrumbidgee River and processed at the Jugiong Water Treatment plant. This is compared to the same period in 2019/20 where 3547ML was produced, this is a 788ML reduction compared to the same period in 2019/20, as indicated by the graph below.

**Minutes of the Meeting of GOLDENFIELDS WATER COUNTY COUNCIL held at
TEMORA OFFICE on 24 June 2021**

As mentioned above, Jugiong water production has decreased by 788ML thus far compared to the previous financial year period. As indicated below, October 2020 through to March 2021 has seen a significant decrease in monthly production compared to previous years, this is due to the above average rainfall, number of wet days and cooler than usual weather during spring and summer. There has been a slight recovery in April and May where water production has aligned with similar demands in the previous year.

Oura Drinking Water Scheme

The water source at Oura is the Murrumbidgee inland alluvial aquifer, this water is extracted from 4 bores namely: Bores 2, 3, 4 and 6. The raw water then goes through a treatment process at the Oura Water Treatment Plant that includes Aeration, Disinfection and Fluoridation.

The Oura scheme has 33 sets of reservoirs and 19 pumping stations, produces drinking water for approximately 14,600 people in the Bland, Coolamon, Junee, Narrandera and Temora Shires. The Oura scheme can also supply water to the Northern side of the rural area of Wagga Wagga City when required.

For the first 11 months of the 2020/21 financial year, 3494ML of water has been extracted from the Oura Borefield and processed at the Oura Water Treatment Plant. This is an 802ML reduction as compared to the same period in 2019/20 where 4296ML was produced. This is depicted in the graph below.

Minutes of the Meeting of GOLDENFIELDS WATER COUNTY COUNCIL held at TEMORA OFFICE on 24 June 2021

As mentioned above, Oura monthly water production has reduced by 802ML compared to the same period in 2019/20. Similarly the period from October 2020 to February 2021 has seen a decrease in production from the Oura Bores. This is due to the above average rainfall, number of wet days and cooler than usual weather during spring and summer. There has been a slight recovery from March to May, where water production has aligned with similar demands in the previous year.

Mount Arthur Drinking Water Scheme

The Mount Arthur Water Source is from the Lachlan Fold belt Aquifer System. The water is extracted via two bores, bores 1 and 2 located in the Wagga Wagga City Council area South of Matong. The water is disinfected before distribution through 9 sets of reservoirs supplying approximately 2400 people with water in the Coolamon shire.

It should be noted that a new Bore 1 is currently being developed to replace the existing Bore site and associated assets. Upon completion, testing and commissioning of the new Bore 1, the old bore will be decommissioned and removed. Water quality and hydraulic capacity requirements appear to be positive at this stage; however actual confirmation of this cannot be known until full commissioning of the bore occurs.

For the first 11 months of the 2020/21 financial year, 444ML of water has been extracted from the Mt Arthur Borefield. This is a reduction of 14ML compared to the first 11 months for 2019/20 where 458ML was produced. As can be seen in the graph below trending in a similar fashion to historical years.

Minutes of the Meeting of GOLDENFIELDS WATER COUNTY COUNCIL held at TEMORA OFFICE on 24 June 2021

Mt Arthur monthly water production for the first 9 months of the financial year has been variable and not trending as it has in previous years. Whilst Mt Arthur has seen a reduction in demand, it is seeing less of volatility compared to the Oura and Jugiong schemes.

Mount Daylight Drinking Water Scheme

The Mount Daylight water source is from the Lower Lachlan alluvium aquifer. The Mount Daylight bores are jointly operated with Carathool Shire Council. Carathool Shire Council is responsible for bore management. There are 7 sets of reservoirs in the Mt Daylight scheme. Mt Daylight supplies water to approximately 125 people in the villages of Naradhan, Weethalle and Tallimba which is located within the Bland Shire.

For the first 11 months of the 2020/21 financial year, 230ML of water has been extracted from the Mt Daylight Borefield. This is a decrease in volume of 26ML compared to the same period for 2019/20 where 256ML was produced. As can be seen in the graph below trending in a similar fashion to historical years.

Minutes of the Meeting of GOLDENFIELDS WATER COUNTY COUNCIL held at TEMORA OFFICE on 24 June 2021

As mentioned above, the Mt Daylight monthly water production is trending at a reduced rate than previous year's period. However the impacts are not as volatile as the Jugiong and Oura schemes.

UNCONFIDENTIAL

Hylands Bridge - Non Potable

Hylands Bridge supplies Non Potable water to Barellan and Binya. The water is sourced through the Murrumbidgee Irrigation Area where Goldenfields Water holds 165ML shareholding for water entitlement.

For the first 11 months of the 2020/21 financial year, 131ML of water has been extracted from the Hylands Bridge Raw Water scheme. This is a reduced volume of 22ML compared to the first 11 months for 2019/20 financial year where 153ML was produced. As can be seen in the graph below, albeit lower volumes, trending in a similar fashion to historical years.

14.3.2. JUGIONG HIGH VOLTAGE UPGRADE

BOARD RESOLUTION

21/056 RESOLVED on the motion of Crs McCann and Callow

That Council:

1. notes that following a request for tender process conducted under s55 of the *Local Government Act 1993* (NSW) (**LG Act**), Council entered into a contract (**Contract**) with Schneider Electric (Australia) Pty Limited (**Schneider Electric**) for the supply, delivery, installation, site acceptance testing, commissioning and personnel training of high voltage equipment for the Oura Pump Station and Treatment Plant (**Oura**);
2. notes that high voltage equipment is now required for the upgrade of the:
 - 2.1.1 Jugiong water treatment plant (**Jugiong 1**); and
 - 2.1.2 Jugiong booster pumping station (**Jugiong 2**),
(Together, the **HV Equipment** includes Variable Speed Drives (VSD's) and Transformers for the operation of water treatment plant infrastructure and pumping stations)
3. resolves that, pursuant to section 55(3)(i) of the LG Act, because of extenuating circumstances, a satisfactory result would not be achieved by inviting tenders for supply of the HV Equipment;
4. notes that the reasons for Council's decision that a satisfactory result would not be achieved by inviting tenders for supply of the HV Equipment are that:
 - 4.1.1 having standardised high voltage equipment and controls across Oura, Jugiong 1 and Jugiong 2 will deliver substantial cost and efficiency savings to Council, including by:
 - (a) reducing the costs for Council in holding spare parts, as spare parts can be used across the three facilities;
 - (b) reducing training requirements for Council personnel, as different equipment and controls would require different training; and
 - (c) providing operational flexibility, as it will allow for the interchangeability of equipment between sites should there be a critical failure at one site;
 - 4.1.2 if the same high voltage equipment is used, a large portion of the design for the Oura high voltage equipment upgrade can be reused for guidance at the Jugiong 1 and Jugiong 2 high voltage equipment sites, resulting in a substantial cost saving for Council;
 - 4.1.3 Council very recently undertook a thorough tender process for the Oura high voltage equipment under s55 of the LG Act and Council considers it unlikely that any tender for the Jugiong 1 or Jugiong 2 high voltage equipment would deliver any additional value, noting that only one conforming tender was received; and

**Minutes of the Meeting of GOLDENFIELDS WATER COUNTY COUNCIL held at
TEMORA OFFICE on 24 June 2021**

- 4.1.4 there are cost efficiencies in engaging Schneider Electric on substantially the same contract terms as for the Contract rather than drafting and negotiating new contractual documents for Jugiong 1 and Jugiong 2;
- 5. authorises the General Manager or his delegate to:
 - 5.1.1 directly negotiate with Schneider Electric for the purposes of entering into an agreement for the supply, delivery, installation, site acceptance testing, commissioning and personnel training of high voltage equipment for Jugiong 1 and Jugiong 2; and

ALIGNMENT WITH BUSINESS ACTIVITY STRATEGIC PLAN

02 Maximising Regional Water Supply

BACKGROUND

The Board resolved at its August 2020 meeting on the motion of Crs Sinclair and Stadtmiller that the Board provide approval to award the contract for the supply, delivery, installation, site acceptance testing and commissioning of the high voltage equipment for Oura water pump station to Schneider Electric Australia for \$2,068,029 (GST Incl).

REPORT

Goldenfields has previously determined that all three (3) of its high voltage sites which consist of Oura, Jugiong Water Treatment Plant (Jugiong 1) and Jugiong 2 Pump Station assets are at the end of life and require prioritisation for renewal.

The Board has previously awarded design, civil, electrical switchboard and high voltage equipment contracts for the Oura HV Upgrade Project which will be completed in early 2022.

In parallel with the capital delivery of the Oura HV project, Staff have also been undertaking the preliminary works for the Jugiong 1 and 2 high voltage sites. Jugiong 1 site has been prioritised to commence works within the 2021/22 financial year with a requested budget allocation of \$2m and an additional \$3m within the 2022/23 financial year.

Staff are currently preparing contract documents for the proposed delivery of works as per the below:

- Design and Construct tender for civil contract. This includes earth works, buildings, pavement and pits and conduits.

**Minutes of the Meeting of GOLDENFIELDS WATER COUNTY COUNCIL held at
TEMORA OFFICE on 24 June 2021**

- It is proposed to utilise the existing preferred electrical low voltage switch board contractor, through the existing awarded contract 03/2020 that was awarded to JRC Electrical at the October 2020 Council meeting for the switchboards and minor electrical works.
- Utilise the existing awarded contracts of SCADA equipment and commissioning works with the preferred supplier of Safegroup.
- Purchase high voltage equipment via an exemption of tendering as per the recommendations of this report.

It has been identified through the development of the Oura, Jugiong 1 & 2 projects that it is possible for Goldenfields to consider standardisation of equipment for each of the 3 high voltage sites. This means that Council has the ability to maintain one specific brand, size and skill set to manage these assets into the future.

Therefore staff have sought legal advice in terms of Councils ability to seek an exemption from tendering pursuant to section 55(3)(i) of the LG Act, due to extenuating circumstances. It is Council officer's position that a satisfactory result would not be achieved by inviting any additional tenders for supply of the HV Equipment for both the Jugiong 1 and 2 high voltage locations.

This has been determined on the basis that a significant reduction in costs and time for Council could be made from:

- Limiting the amount of spare parts, as spare parts can be used across the three facilities;
- Reducing training requirements for Council personnel, as different equipment and controls would require different training;
- Providing operational flexibility, as it will allow for the interchangeability of equipment between sites should there be a critical failure at one site; and
- If the same high voltage equipment is used, a large portion of the design for the Oura high voltage equipment upgrade can be reused for guidance at the Jugiong 1 and Jugiong 2 high voltage equipment sites, resulting in a substantial cost saving for Council; and
- a significant savings of time will be made during the project delivery phase, as the process for civil design will not be required to wait for the provision of HV equipment and associated designs before it can commence, noting we already have the existing Oura designs completed based off the Schneider equipment.

In addition to the significant cost and time savings, it is also known that as per the previous HV equipment tender that was resolved in August 2020, that Schneider were the only conforming bid that met Councils requirements at the time. Specifically but not limited to, no other suppliers offered the mandatory installation requirements requested by council. It was also advised at the time that Schneider's offer was deemed value for money in comparison with all other offers made. Please find tabled, the previous confidential report to award, which details the previous evaluation process for selecting Schneider equipment.

On this basis, staff are recommending that the Board resolves that, pursuant to section 55(3)(i) of the LG Act, due to extenuating circumstances, seek to directly negotiate the supply of high

voltage equipment with Schneider Electric for both Jugiong Water Treatment Plant (Jugiong 1) and Jugiong 2 Water Pump Station sites.

14.4.1. NANGUS BUSINESS CASE

BOARD RESOLUTION

21/057 RESOLVED on the motion of Crs Armstrong and Callow that the Board note the outcomes of the Nangus Business Case.

Report prepared by Interim Engineering Manager

COUNCIL OFFICER RECOMMENDATION

That the Board note the outcomes of the Nangus Business Case

ALIGNMENT WITH BUSINESS ACTIVITY STRATEGIC PLAN

02 Maximising Regional Water Supply

BACKGROUND

Cootamundra Gundagai Regional Council (CGRC) has received numerous requests from Nangus residents for the provision of potable water services to the village. As a result CGRC has requested GWCC involvement in the project to potentially design, build and operate a new town water supply scheme. At this stage both Council's have agreed to a staged approach for the delivery of a feasibility study and the development of a business case.

The feasibility study was concluded and considered by the GWCC Board at its meeting in February 2020, with the board resolving:

That the Board

1. Note the outcome of the Nangus feasibility study.
2. Approve Council to proceed to business case for Options 2 and 7, subject to Cootamundra Gundagai Regional Council's concurrence.

REPORT

Council has now received the business case which considers the economic appraisal required for any of the formal State or Federal Government funding streams. The completed business case indicates that the associated costs both for construction as well as ongoing operational costs outweigh the potential benefits of undertaking the project.

In developing this economic appraisal, the following was considered

- Project Cost Estimate
- Annual operating costs (excluding consumption and depreciation)
- Tangible Benefits
 - o health related
 - o Avoidance on water carting
- Intangible benefits
 - o Improved amenity
 - o Social satisfaction

As this report was written around seeking funding the economic analysis was undertaken in line with

- Cost-Benefit Guide 2019 (INSW, 2019)
- Safe and Secure Water CBA Toolkit

Utilising these resources a project with a positive Benefit Cost Ratio (BCR) above one (1) is considered to be economically viable. In this project a BCR of 0.16 is achieved, that is for every dollar invested, the project returns only 16 cents in benefits.

In the development of the Business case, the initial estimate furnished to CGRC has undergone several refinements as the project has gone from a discussion to a concept to feasibility to business case. At each step, more rigorous cost estimating has been employed.

The current estimate of \$8,430,000 includes the following

- 20% Allowance for overheads being Project Management, designs etc
- Excavation through rock type material
- Water connections and hydrants included in the village reticulation
- Provision of reservoir at Nangus for water security
- Improvements to the GWCC Oura Scheme to account for the impact on the network due to the demand from Nangus
- Contingency of 30% as this is still a concept level design

It should also be noted that the unit rate figures used in the current estimate are based on current industry pricing for similar projects under similar conditions rather than a nationwide average.

FINANCIAL IMPACT STATEMENT

Currently GWCC is undertaking a large scale asset renewal program. This is aimed at securing the condition of GWCC critical infrastructure to continue supplying reliable and safe water to its current network.

The recommendation does not impact on Council's financial position.

14.5.5. EXTRAORDINARY COUNCIL MEETING

BOARD RESOLUTION

21/062 RESOLVED on the motion of Crs McGlynn and Stadtmiller that the Board consider a suitable date to hold an extraordinary meeting of Council to consider the Thanowring Road Materials Tender, prior to the enforcement of the caretaker period.

The Board agreed to hold the Extraordinary meeting on Tuesday 3 August at 10.00am.

Report prepared by General Manager

COUNCIL OFFICER RECOMMENDATION

That the Board consider a suitable date to hold an extraordinary meeting of Council to consider the Thanowring Road Materials Tender, prior to the enforcement of the caretaker period.

ALIGNMENT WITH BUSINESS ACTIVITY STRATEGIC PLAN

03 Strategic Water Management

BACKGROUND

In accordance with 393B of the Local Government Act, Councils enter into a 'caretaker' period during the 4 weeks preceding the date of ordinary elections. This prevents Council from entering into a contract greater than \$150,000 or 1% of Council's revenue in rates from the previous year, during that time.

Local Government elections are being held 4 September 2021, resulting in Goldenfields entering the caretaker period from 7 August 2021.

REPORT

The Thanowring Road Materials Tender is due to be released in the coming weeks and will close on or around 20-27 July 2021. Due to the caretaker period encompassing the 26 August Council Meeting date, this contract could not be awarded until the October Council meeting.

**Minutes of the Meeting of GOLDENFIELDS WATER COUNTY COUNCIL held at
TEMORA OFFICE on 24 June 2021**

This delay in awarding the Thanowring Road materials tender would then delay the anticipated commencement timeframe of the Thanowring Road mains upgrade.

An Extraordinary Meeting of Council prior to 7 August 2021, is suggested in order for the Board to consider the Tender before the caretaker period commences.

A date during the week commencing 2 August 2021 is suggested in order for Council officers sufficient time to have undertaken due diligence in assessing the Thanowring Road Materials Tender.
