World Water Day is a day dedicated to drawing attention to water related issues. It's easy to take water for granted, it just comes out of the taps anytime you want it. Yet, all over the world there are people who don't have access to clean, safe drinking water.

Water affects everyone, so we all need to take action. You, your family, your school and community can make a difference by changing the way you use, consume and manage water in your lives.
